

None of the other seal tools accurately position the CV seal

The way to check the position is to crawl under and look at the lip of the seal touching the CV joint

Not all seals have the same metal so they have to be positioned by where the seal hits the CV joint

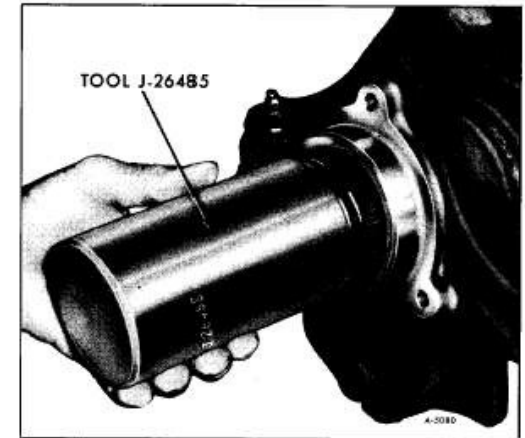

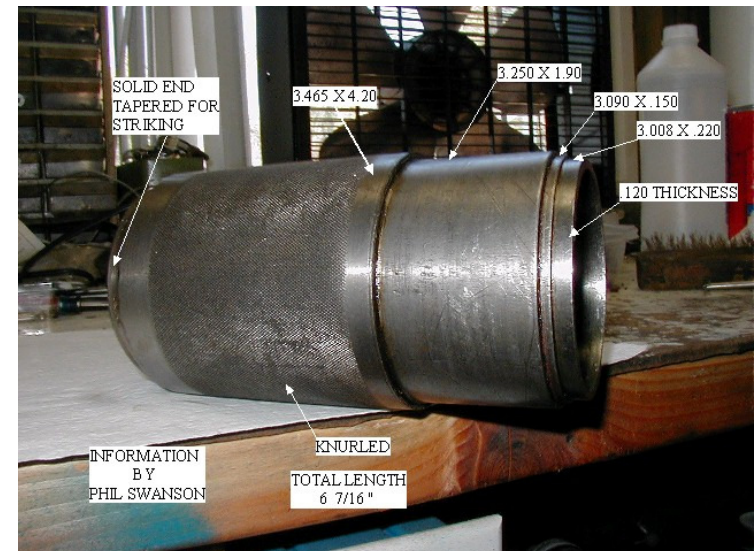

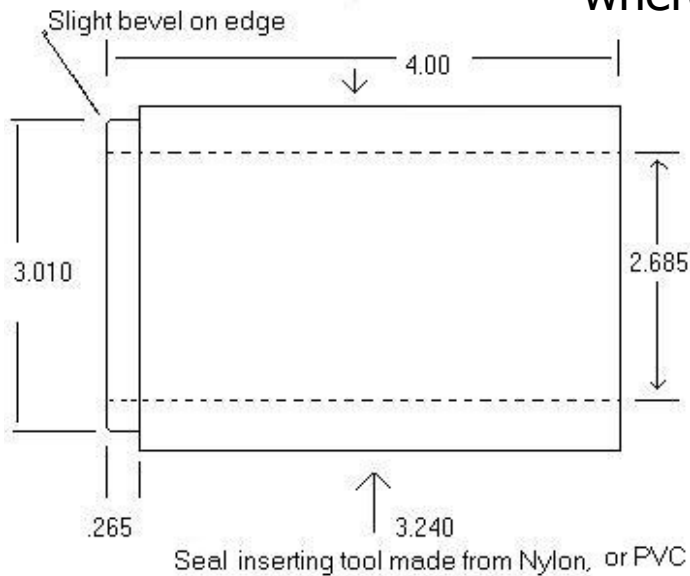

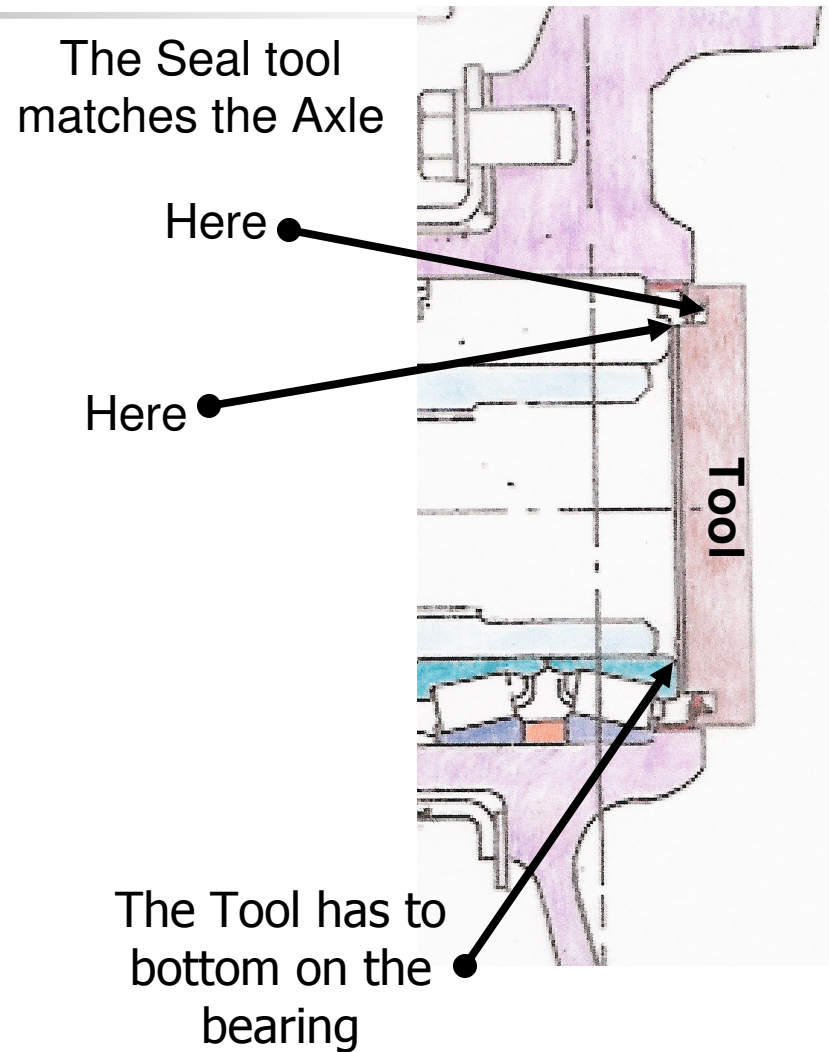

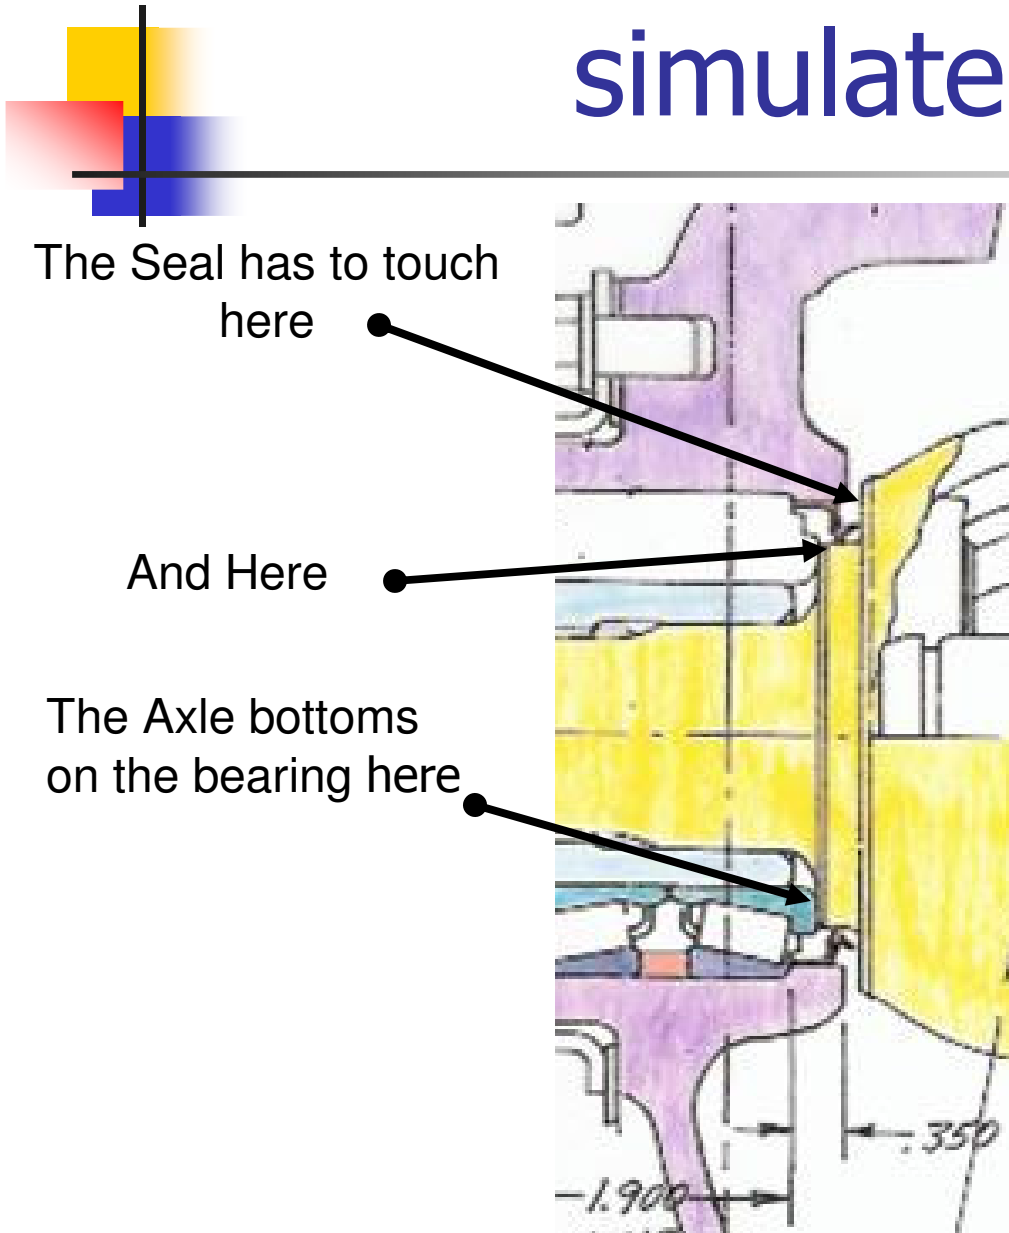

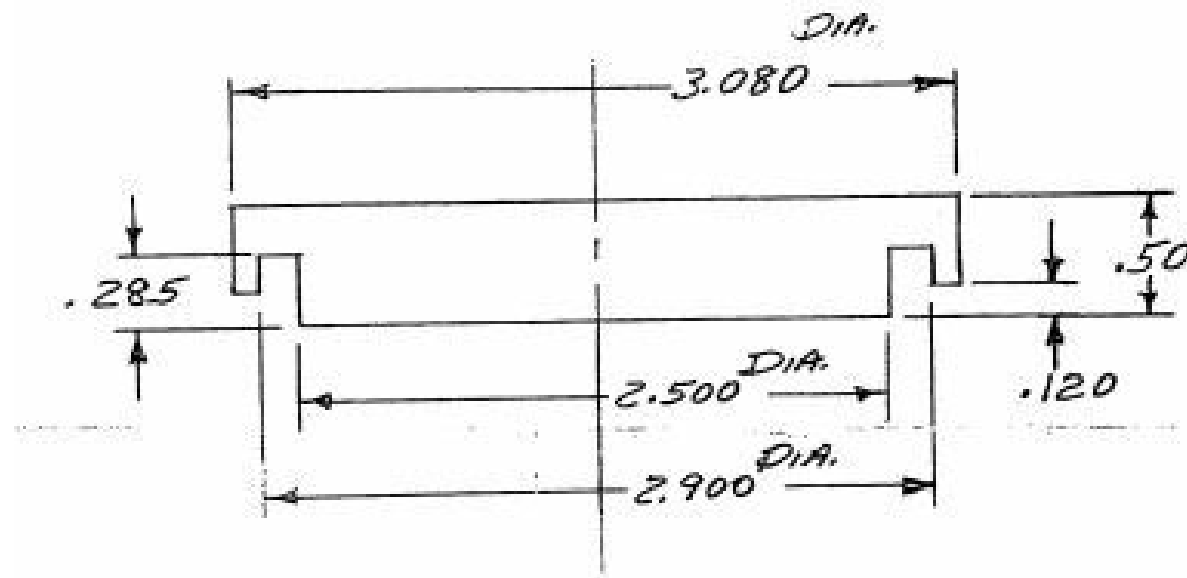

Figure 12—Installing Knuckle Seal

Dave Lenzi's Seal Tool simulates the axle

Dave Lenzi's Seal tool

Buy it from Dave or build your own tool to set the Seal to the CV joint
